

553 Prestressed Concrete Members, 554 Precast Concrete Products

Qualification Requests

On the request that is sent in the plant must include their current ACPA (American Concrete Pipe Association), NPCA (National Precast Concrete Association) and/or PCI (Prestressed Concrete Institute) certificates.

Qualification for Plants

The requirements for request that are received for QPL prequalification are as follows.

- ◆ The producer must have a current ACPA, NPCS, and/or PCI certificate.
- ◆ MDT will do a plant inspection to ensure compliance to the certifications.

Material Requirements

Requirements for precast and prestressed products may be found in the Standard Specifications for Road and Bridge Construction subsection 553, 554, 603, 604, 708.01 and 708.02, the Supplemental specifications to Montana Standard Specifications subsection 553, 554, 603, 604, 708.01 and 708.02, or contract Special Provisions.
